All data are based on the aggregation of whole block group units of geography to approximate CRU, HRU, Place and County boundaries Part One and Part Three variables are drawn from 1990 and 2000 census 100% count files (STF1A and SF1, respectively). Part Two variables are drawn from 1990 and 2000 census sample data files (STF3A and SF3, respectively).

Census Designated Places (CDPs) are delineated for the decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide data for settled concentrations of population that are identifiable by name but are not legally incorporated under the laws of the state in which they are located. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or a other legal entity boundary have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary. There are no population size requirements for CDPs for Census 2000. For the 1990 and previous censuses, however, the U.S. Census Bureau required CDPs to qualify on the basis of various minimum population size criteria. As a result, several CDP's defined for the 2000 census were too small to be defined as CDPs in 1990

<sup>\*</sup>Race Counts exclude those who indicated that they are of two or more races. That is, 2000 race variables only include those who said that they are of one race.

<sup>\*\*</sup> Areas having a a CDP designation for the 2000 but not for the 1990 census. Comparison data are based on the 1990 census block group containing the area defined by the 2000 CDP. Caution should be used when interpreting trends for these small areas.

<sup>\*\*\*</sup> The classification of Industries and Occupations changed for some catgegories between 1990 and 2000, resulting in comparison of similar, but not identical groupings Caution should be used when inferring trends for these variant groupings.

<sup>\*\*\*\*</sup> Averages are based on those households reporting income from that source, and excludes those households not reporting any income from that source.

<sup>1</sup> A small part of the Buckeye Valley CRU occupies census block groups 1 and 4 of tract 9410 in Pinal County. The populations of these two block groups have been added to the Buckeye Valley CRU and Buckeye HRU.
